METALOGIX CONTROLPOINT

Security. Compliance. Administration.

Permissions, Auditing, Reporting
& Governance Policies for SharePoint

Confidently Manage Permissions

Ensure permission policy compliance, prevent security breaches and unauthorized access to sensitive content. Audit, clean-up and manage SharePoint permissions and users from ControlPoint's single console across all sites, site collections, or farms. Analyze and manage all aspects of permissions whether they are directly assigned, inherited or granted through Active Directory or SharePoint groups.

NEW - Take Action on Sensitive Content (PII)

When combined with the new Metalogix Sensitive Content Manager solution ControlPoint can alert, quarantine, or remove files containing Personally Identifiable Information (PII). Custom workflows can be architected with ease to enforce the corporate compliance lifecycle while reducing the workloads on SharePoint administrators, content owners and compliance officers.

Audit User & Admin Actions

Respond to audit requests in minutes not days. Know who accessed your sensitive content during the last week or month. ControlPoint's powerful features take the pain out of complex and time-consuming compliance, auditing and reporting tasks. Identify user or administrator activity with unparalleled granularity – from configuration changes to documents accessed.

Single Console for SharePoint On-Premises & Office 365 including OneDrive for Business

On-premises, Office 365 or hybrid SharePoint deployment? Adopting OneDrive for Business? Single or multiple farms? Use ControlPoint to manage and administer them all from one place. ControlPoint is MSO-CAF certified and pre-approved by Microsoft for Office 365 Dedicated environment.

Clean-Up SharePoint Content

As SharePoint grows in volume and complexity, ControlPoint helps you manage change, remove irrelevant or unused information and take action to prevent SharePoint sprawl keeping your environment clean and organized. You can also streamline your migration plans by optimizing storage and eliminating dormant content.

Automate Site Creation & Delegate Governance

Reduce risk, maintain compliance and take control of who can do what in SharePoint with ControlPoint's site provisioning and policy enforcement features. Enable users to automatically create sites with approved access privileges, use of versioning, file upload limits, site quotas and the use of site templates. Save time by delegating control to discrete site administrators or power users.

Tech Specs

Supported Systems

- Office 365
- SharePoint 2013 (Server & Foundation)
- SharePoint 2010 (Server & Foundation)
- SharePoint 2007 (MOSS, WSS 3.0)
- Windows Server 2003, 2008 or 2012
- SQL Server 2005, 2008 or 2012
- Internet Explorer 8, 9, 10 & 11, Chrome, Firefox
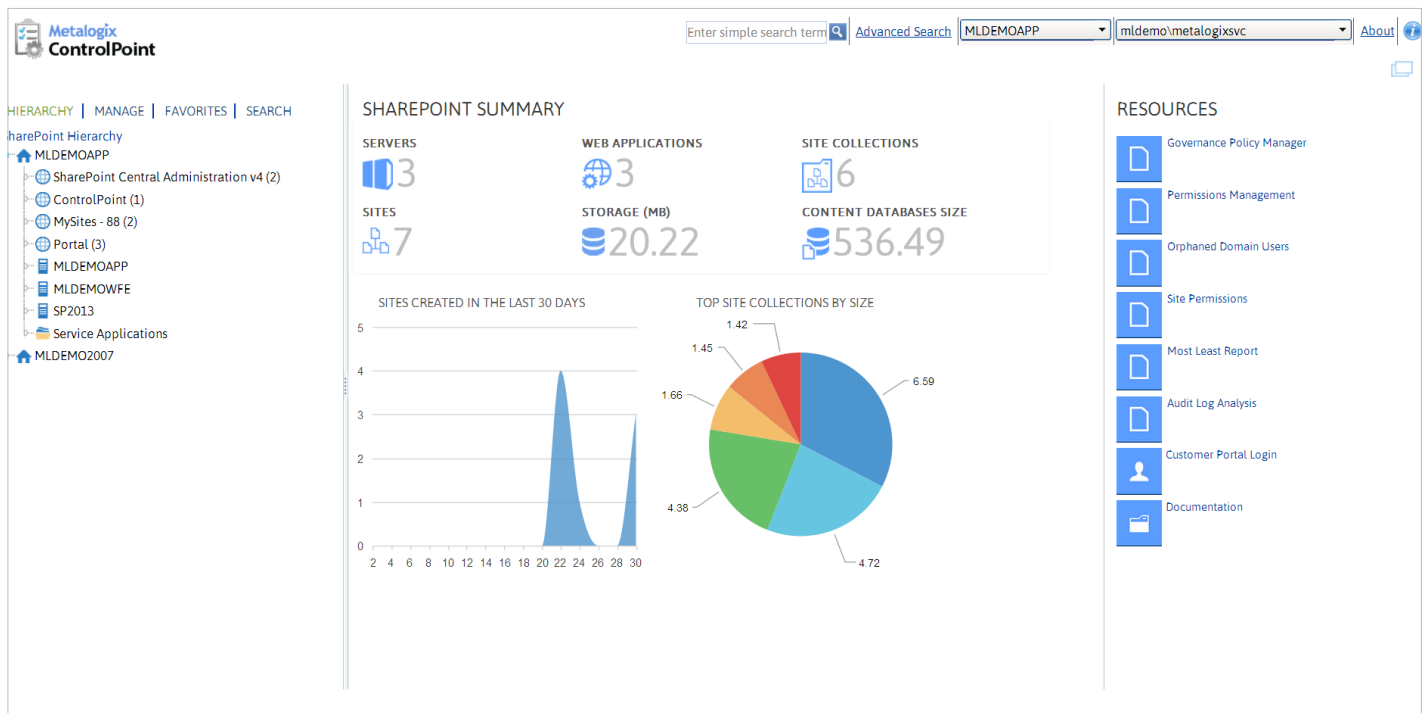

Speed Up Administration Tasks

ControlPoint lets you quickly respond to requests and take action faster. Need a list of all the documents a user accessed within the last 90 days? Simple. ControlPoint will generate a report in seconds. As one client said, "it makes getting information out of SharePoint 1,000 times faster."

Enforce Consistent Sites & Experiences

Enhance user adoption of SharePoint and maintain a consistent experience across your environment. ControlPoint makes it easy to create sites and apply policies for site theme, site collection administrator, quotas, even regional or versioning settings across any number of site collections, sites or lists.

Monitor User Adoption

Discover your most valuable information, and your least, by monitoring individual user activity. In ControlPoint it's easy to determine exactly who is accessing which documents. Use this insight to investigate or set permission policies and discover best practices to improve user adoption elsewhere.

About Metalogix

Metalogix provides industry-recognized management tools for mission-critical collaboration platforms. These tools are engineered and supported by experts committed to the rapidly evolving deployment and operational success of our clients.

Metalogix' world-class tools and client service have proven to be the most effective way to manage increasingly complex, and exponentially growing metadata and content across collaboration platforms.

For over a decade, Metalogix has developed the industry's best and most trusted management tools for SharePoint, Exchange, and Office 365, backed by our globally acknowledged live 24x7 support. Over 20,000 clients rely on Metalogix Tools every minute of every day to monitor, migrate, store, synchronize, archive, secure, and backup their collaboration platforms.

Metalogix is a Microsoft Gold Partner, an EMC Select Partner, and a GSA provider. Our Client Service division of certified specialists is the winner of the prestigious NorthFace ScoreBoard Award for World Class Excellence in Customer Service.
